Mrs. Fleming superintended the measurement of the plates and the preparation of the catalogue, being assisted throughout by a staff of ladies. The volume contains five tables, of which the first is the actual Draper Catalogue. This contains the reference number of each star, its number in the Durchmusterung and in the Harvard Photometry, its place for 1900, and the number of photographs obtained of it. Then follow the type of the spectrum and its photographic magnitude, and a table of the differences between this last value and the Bonn, Argentine, and Harvard magnitudes respectively. The types of spectra upon which the classification is based are not precisely those of Secchi, or of any other previous grouping, since certain grades of difference were readily recognised...
