

Manganese deposits of the United States with sections on foreign deposits, chemistry, and uses

By Edmund Cecil Harder

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 114 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: . . . a long period of precipitation there occurred an expansion of the old lake, bringing the shore line back to its original position and resulting later in the continued deposition of calcareous tufa. MINOR DEPOSITS. UTAH. Manganese ores are reported from the vicinity of Joy, Juab County, Utah, 40 miles west of Oasis. The deposit is said to run 4,500 feet along the contact of a limestone and granite, the latter being on the foot wall, and to have been tested to a depth of 110 feet. The ores have the following composition: Analyses of manganese ores from Joy, Utah. Booth, Garrett, and Blair, Philadelphia, analysts. A deposit of manganiferous silver ore is being developed near Modena, 6 Iron County. It occurs in decomposed limestone on the foot wall of an igneous dike, consists of black oxide of manganese (probably wad), iron oxide, and calcite, and...
