These pats, to satisfactorily pass the requirements, shall remain firm and hard, and show no signs of distortion, checking, cracking, or disintegrating. SULPHURIC ACID AND MAGNESIA. 24. The cement shall not contain more than 1.75 per cent. of anhydrous sulphuric acid (SO;,), nor more than 4 per cent. of magnesia (MgO). VII. ADDENDUM. METHODS FOR TESTING CEMENT. Recommended by the Special Comittee on Uniform Tests of Cement of the American Society of Civil Engineers. Sampling. 1.--Selection of Sample.--The selection of samples for testing should be left to the engineer. The number of packages sampled and the quantity taken from each package will depend on the importance of the work and the facilities for making the tests. 2.--The samples should fairly represent the material. When the amount to be tested is small it is recommended that one...

Reviews

Absolutely among the best publication I have at any time go through. It is definitely basic but shocks from the 50 % of the book. I discovered this book from my i and dad advised this publication to find out.

-- Solon Pacocha

A top quality pdf and also the font employed was intriguing to read. It is one of the most awesome publication we have read. I am delighted to tell you that here is the finest book we have go through in my personal life and can be he very best pdf for at any time.
